MICHAEL XEVGENIS, PhD

CLOUD, INFRASTRUCTURE & TECHNICAL PROJECT PROFESSIONAL

RESEARCHER & ADJUNCT LECTURER

University of West Attica

Athens, Greece • mxevgenis@uniwa.gr • linkedin.com/in/michael-xevgenis-4b85659a • github.com/mxevgenis

PROFESSIONAL PROFILE

PhD-qualified ICT professional with 8+ years of experience designing, delivering and operating cloud, networking, distributed-system and cybersecurity solutions in European R&D environments. Combines hands-on engineering in OpenStack, Kubernetes and blockchain with technical task leadership, requirements analysis, systems integration, stakeholder coordination and university teaching. Translates research and business objectives into secure architectures, executable work plans, measurable outputs and maintainable infrastructure.

CORE CAPABILITIES

Cloud & Infrastructure
OpenStack, Kubernetes, Docker, Linux, Ansible, storage, networking

Technical Delivery
Requirements, architecture, planning, dependencies, KPIs, validation

Distributed Systems
Blockchain, Hyperledger Besu, Solidity, APIs, identity and access control

Observability & Automation
Prometheus, Grafana, Python, Bash, YAML, repeatable deployments

Stakeholder Leadership
EU consortia, partner coordination, documentation, presentations, mentoring

Research & Teaching
Next-generation networks, cybersecurity, cloud, AI and blockchain

SELECTED TECHNICAL ACHIEVEMENTS

- Designed, implemented and operated a private OpenStack research cloud with 10+ servers, supporting distributed applications for the STORM and TRILLION European projects.
- Built Kubernetes research environments with persistent storage, service exposure and Prometheus/Grafana observability; configured Kubeflow infrastructure for AI workloads.
- Designed secure blockchain applications and testbeds using Hyperledger Besu, Solidity, decentralized identity and automated monitoring for trust and access-control research.
- Developed VLAB, a cloud-native environment delivering customized virtual instances for laboratory users, and contributed to advanced first-responder networking platforms.

PROFESSIONAL & PROJECT EXPERIENCE

Researcher & Adjunct Lecturer — University of West Attica **2024—2026**

- Conduct research and teach cloud computing, blockchain, internet technologies, data security and related subjects; supervise student projects and support laboratory infrastructure.
- Head the Cloud Computing sector of the CONSERT Laboratory, coordinating shared platforms and technical activities for collaborative R&D.

Software Engineer / Task Leader — Block.Ed — Hellenic Open University · Erasmus+ **2025—2026**

- Lead a technical task for a blockchain-enabled platform supporting secure, portable microcredential verification; coordinate partner inputs, architecture, implementation, integration and documentation.

Researcher / Software Engineer — LIFE-GENERA — University of West Attica · EU LIFE **2023—2024**

- Designed and implemented a distributed blockchain component for an energy-transition platform, coordinating interfaces, integration and validation with multidisciplinary partners.

PROFESSIONAL & PROJECT EXPERIENCE — CONTINUED

Researcher / Software Engineer — RESCUER — University of West Attica · Horizon 2020 **2022—2023**

- Designed and developed an augmented sensing network for first responders in adverse and infrastructure-less environments; contributed to requirements, architecture, integration, testing and experimental validation.

Network Engineer — FASTER — University of West Attica · Horizon 2020 **2019—2023**

- Evaluated communication architectures and integration options for advanced first-responder technologies; contributed to technical specifications, deliverables and multi-partner validation.

Cloud Computing Specialist — STORM / TRILLION — University of West Attica · Horizon 2020 **2016—2019**

- Designed and operated private OpenStack infrastructure; automated deployments with Ansible and supported development teams with provisioning, networking, integration and troubleshooting.

LEADERSHIP & PROFESSIONAL SERVICE

- Organizer, Athens OpenStack User Group — convene technical meetups connecting researchers, engineers and open-infrastructure practitioners in Athens.
- Member, OpenInfra Foundation; active contributor to the wider open-source infrastructure community.
- Mentor junior colleagues and supervise undergraduate/postgraduate projects through objective setting, task delegation, progress review and final evaluation.
- Experienced English-language technical writer and presenter across specifications, EU deliverables, proposals, reports, publications, workshops and lectures.

EDUCATION & CERTIFICATIONS

- Postdoctoral Research in Next Generation Networks — University of West Attica, 2023–2025
- PhD in Next Generation Networks — University of West Attica, 2019–2023 | Secure resource management in next-generation networks
- MSc in Networking and Data Communications — Kingston University, 2014–2016 | Distinction
- BSc in Electronics Engineering — Piraeus University of Applied Sciences, 2008–2013
- Google Project Management Professional Certificate, 2025 | NVIDIA-Certified Associate: AI in the Data Center, 2023

TECHNOLOGY PROFILE

Platforms: Kubernetes, OpenStack, Docker, Rancher, Kubeflow, Linux

Automation & Operations: Ansible, Prometheus, Grafana, Git, Python, Bash, YAML

Blockchain & Security: Hyperledger Besu, Quorum, Solidity, decentralized identity, access control, cybersecurity

Networks & Architecture: Cloud/on-premises systems, distributed systems, APIs, SDN/NFV, 5G/6G, service integration

Delivery: Requirements analysis, technical planning, task coordination, KPIs, risks, integration, testing, validation, Agile/Waterfall concepts

Languages: Greek — native | English — excellent | German — basic

WORKING STYLE

Structured, evidence-driven and collaborative. Comfortable moving between architecture decisions, implementation details, partner coordination and executive-level communication. Particularly effective where research prototypes must become reliable, observable and reusable technical platforms.
