Academic Curriculum Vitae

Michael G. Xevgenis, PhD

Researcher · Lecturer · ICT Engineer
Athens, Greece
Google Scholar · ORCID · LinkedIn · GitHub

SCIENTIFIC PROFILE: I am a Computer Scientist with specialization in distributed computing systems, cloud and edge computing, next generation networks, and blockchain-based technologies. I hold a PhD in Next Generation Networks from the University of West Attica and I am currently a Researcher in the same field. My scientific work focuses on the design of secure, scalable, and data-driven digital infrastructures, combining strong theoretical foundations with applied research and experimental validation. I have a sustained research presence in areas such as network security, decentralized trust mechanisms, and resource management for modern networked systems, with publications in peer-reviewed international journals, conferences, and edited volumes.

PART A: EDUCATION

Year	Studies & Other
2023 – 2025	**Postdoctoral Researcher in Next Generation Networks**, Supervisor: Helen C. Leligou, University of West Attica (UniWA)
2019 - 2023	**PhD in Next Generation Networks**, Supervisor: Helen C. Leligou, University of West Attica (UNIWA) Dissertation: "Secure resource management in Next Generation Networks (NGNs)"
2014 – 2016	**MSc in Networking and Data Communications**, Kingston University Graduated with Distinction, Grade: A
2008 - 2013	**BSc in Electronics Engineering**, Piraeus University of Applied Sciences (PUAS) (4-years curriculum)

PART B: RESEARCH ACTIVITY / PROFESSIONAL EXPERIENCE

My research activity has been closely linked to European funded projects, including Horizon 2020, LIFE, and Erasmus+ programmes, where I have served as researcher, software engineer, and task leader. My professional experience includes the design and implementation of cloud-native infrastructures, blockchain platforms, and secure networking solutions for diverse real-world use cases such as emergency response systems, energy transition platforms, cultural heritage protection, and digital education ecosystems. Through these projects, I have gained substantial experience in applied research, collaborative international environments, technology transfer, and dissemination of scientific results. My research interests emphasize experimental validation, real-life deployments, and the alignment of emerging technologies with societal and industrial needs.

Time Period	Projects (Role, Institution, Description)
23/10/2025 – 31/08/2026	**Research Project:** *"Block.Ed - Empowering Adult Learners through Microcredential Blockchain Integration", Erasmus+ KA2-KA220* **Role:** Software Engineer / Task Leader **Institution:** School of Science and Technology, Hellenic Open University (HOU) **Contribution:** Design and development of a blockchain-based verification platform for microcredentials.
27/12/2023 – 15/12/2024	***Research Project:*** *""LIFE-GENERA- REVITALIZING THE ENERGY TRANSITION IN TOURIST ISLANDS", LIFE-2021-CET-LOCAL* ***Role:*** *Researcher / Software Engineer* ***Institution:*** *University of West Attica (UniWA)* ***Contribution:*** *Design and development of blockchain network to support the GENERA platform.*
28/01/2022 – 27/01/2023	***Research Project:*** *"RESCUER- first RESponder-Centered support toolkit for operating in adverse and infrastrUcture-less EnviRonments", Horizon 2020, under GRANT AGREEMENT N° 101021836* ***Role:*** *Researcher / Software Engineer* ***Institution:*** *University of West Attica (UniWA)* ***Contribution:*** *Design and development of augmented sensing network.*
01/10/2019 – 31/12/2023	**Research Project:** *"FASTER – First responder Advanced technologies for Safe and efficient Emergency Response", Horizon 2020, under GRANT AGREEMENT N°833507* **Role:** Network Engineer **Institution:** University of West Attica (UniWA) **Contribution:** Study and examination of the ECoBox communication method.
10/11/2016 – 31/05/2019	**Research Project:** *"STORM: Safeguarding Cultural Heritage through Technical and Organizational Resources Management", Horizon 2020, under GRANT AGREEMENT N°700191* **Role:** Cloud Computing Specialist

	Institution: University of West Attica (UniWA) **Contribution:** Design, implementation, and development of the OpenStack cloud computing infrastructure to support STORM services.
25/02/2016 – 31/08/2018	**Research Project:** *"TRILLION - TRusted, CItizen -LEA coILaboratIon over sOcial Networks", Horizon 2020, under GRANT AGREEMENT N°653256* **Role:** Cloud Computing Specialist **Institution:** University of West Attica (UniWA) **Contribution:** Design, implementation, and development of the OpenStack cloud computing infrastructure to support the services of TRILLION.

PART C: TEACHING EXPERIENCE

My teaching approach is student-centred, practice-oriented, and closely integrated with research activities. I aim to provide students with solid theoretical foundations while simultaneously developing their practical skills through laboratory-based learning, project-driven assignments, and continuous assessment. I employ real-world case studies, modern tools, and research-inspired problems to help students connect theory with practice, particularly in courses related to computer networks, cloud computing, data protection, and data-intensive systems. I place strong emphasis on clear knowledge transfer, active student participation, and mentorship, guiding students to develop critical thinking, problem-solving abilities, and independent learning skills. I am able to teach in English at both undergraduate and postgraduate levels in multicultural academic environments.

C1. Undergraduate Teaching

University of West Attica

Time Period	Description

11/03/2024 – 10/07/2026 (Spring Semesters of 2024 – 2026, Fall Semesters of 2024 - 2025)	**Adjunct Professor** *Department of Industrial Design and Production Engineering, University of West Attica (UniWA)* ***Job description:*** *Sole Lecturer through the ESPA program: "ACQUIRING ACADEMIC TEACHING EXPERIENCE IN NEW SCIENCES FOR DOCTORATE HOLDERS AT THE UNIVERSITY WESTERN ATTICA." Responsible for conducting the theoretical and laboratory part of the course within the framework of self-directed teaching.* Conducting lectures and laboratory sessions. Responsible for the overall evaluation of students. **Courses taught:** - Internet technology in digital industry (Computer Networks)- course in the 6th semester of the 5-years curriculum - Spring Semesters - Data Protection and Security- course in the 9th semester of 5-years curriculum (integrated master) Fall semesters - Cloud Computing- course in the 9th semester of 5-years curriculum (integrated master) Fall semesters
01/04/2022 – 30/09/2022 **20/05/2021 – 30/09/2021**	**Academic Fellow** *Department of Industrial Design and Production Engineering, University of West Attica (UniWA)* ***Job description:*** *Responsible for delivering lectures related to the field of computer networks and for assessing students for the winter semester. More specifically, conducting laboratory courses for the Computer Networks course of the Department of Industrial Design and Production Engineering.*

C2. Postgraduate Teaching

University of West Attica

Time Period	Description
21/11/2023 –	**Lecturer**

16/02/2024	*MSc in Artificial Intelligence and Deep Learning, Department of Electrical and Electronics Engineering, University of West Attica (UniWA)* ***Job description:*** *Lecturer in Knowledge representation and big data Assisting in teaching the course Knowledge representation and big data. Responsible for the theoretical and laboratory parts of the course. Total teaching hours: 31.5 hours. Specifically: Conducting theoretical and laboratory lectures on the management of large volumes of data. Responsible for the final assessment of students.*
29/03/2022 – 15/07/2024	**Lecturer** *MSc in New Technologies in Shipping and Transport, Department of Industrial Design and Production Engineering, University of West Attica (UniWA)* ***Job description:*** *Lecturer in Data Transmission Networks. Responsible for the theoretical and laboratory parts of the course. More specifically, conducting theoretical and laboratory lectures on computer networks and evaluating students. Total teaching hours: 63 hours.*

C3. Other Teaching Activities

Time Period	Description
2022	Instructor for the course **"Introduction to Blockchain Technology"** at the **Centre for Lifelong Learning**, University of West Attica.

Research Interests:

- **Distributed Computing Systems and Distributed Ledger Technologies (DLT / Blockchain):** distributed digital identity, consensus algorithms, dynamic resource allocation, trust mechanisms, oracles, Zero-Knowledge Proofs and DAOs.
- **Cloud and Edge Computing:** architectures for distributed infrastructures, security of computing and communication resources, operation under real-world constraints, adoption and engagement with open-source technologies for cloud deployments, design and implementation of high performance computing infrastructures for AI workloads, development of CI/CD pipelines for massive and secure deployment.
- **Next Generation Networks:** design of highly secure architectures for Zero Touch Networks, alignment with Zero Trust Architecture principles,

adoption of AI technology for network resource management, design of mechanism to ensure trustworthy operation of network services in multivendor scenarios, adoption of Software Defined Networks and Network Function Virtualization technologies for resilient networks.

Emphasis is given on applied research, experimental validation, and real-world deployments.

Positions & Academic Engagements

- Organizer of the Athens OpenStack User Group member of the OpenInfra Foundation, responsible for organizing workshops and technical discussions fostering innovation and excellence in the cloud computing sector.
- Head of Cloud Computing sector in the CONSERT Laboratory, University of West Attica (UniWA).
- Guest Editor of Special Issue: Blockchain in NGNs: Challenges, Limitations and Future Research Directions, MDPI Electronics Journal.
- Guest Editor of Special Issue: Blockchain and IoT: Security and Privacy Advancements, Integration, Opportunities and Open Issues, MDPI Electronics Journal.
- Reviewer at several journals and conferences.

Thesis Supervision

Supervision of thesis on both **undergraduate** (5-years integrated master program) and **postgraduate** programs in the field of **distributed ledger technologies**, **cloud computing** and **next generation networks**.

PART D: RESEARCH PUBLICATIONS

A. Peer-Reviewed Journal Articles

1. Kogias, D, **Xevgenis, M. G.** and Patrikakis, C. Z., **"Cloud federation and the evolution of cloud computing"** Computer, vol. 49, no. 11, pp. 96–99, 2016.

2. Kogias, D. G., Leligou, H. C., **Xevgenis, M. G.,** Maria Polychronaki, Evangelos Katsadouros, George Loukas, Ryan Heartfield, and Patrikakis, C. Z., **"Toward a Blockchain-Enabled Crowdsourcing Platform."** IT Professional, vol. 21, no. 5, pp. 18–25, 2019.
3. **Xevgenis, M.,** Kogias, D. G., Karkazis, P., Leligou, H. C., and Patrikakis, C. Z., **"Application of Blockchain Technology in Dynamic Resource Management of Next Generation Networks"** Information (Switzerland), vol. 11, no. 12, pp. 570, 2020.
4. **Xevgenis, M.,** Kogias, D., Christidis, I., Patrikakis, C., and Leligou, H. C., **"Evaluation of a blockchain-enabled resource management mechanism for NGNs."** International Journal of Network Security and Its Applications, vol. 13, no. 5, pp. 18–25, 2021.
5. **Xevgenis, M.,** Kogias, D. G., Karkazis, P. A., and Leligou, H. C., **"Addressing ZSM Security Issues with Blockchain Technology. Future Internet."** Future Internet, vol. 15, no. 4, pp. 129, 2023.
6. Maria Polychronaki, **Xevgenis, M.,** Kogias, D. G., and Leligou, H. C., **"Decentralized Identity Management for Metaverse-Enhanced Education: A Literature Review."** Electronics, vol. 13, no. 19,pp. 3887, 2024.
7. **Xevgenis, M.,** Maria Polychronaki, Kogias, D. G., Leligou, H. C., and Eirini Liotou, **"Securing Zero-Touch Networks with Blockchain: Decentralized Identity Management and Oracle-Assisted Monitoring,"** Electronics, vol. 15, no. 2, pp. 266, 2026.

B. Book Chapters / Edited Volumes

1. Kasnesis, P., Kogias, D. G., Toumanidis, L., **Xevgenis, M. G.,** Patrikakis, C. Z., Giunta, G., and Calsi, G. L., **"An IoE Architecture for the Preservation of Cultural Heritage: The STORM Use Case. In Harnessing the Internet of Everything (IoE) for Accelerated Innovation Opportunities"** in IGI Global, pp. 193–214, 2019.
2. **Xevgenis, M.,** Kogias, D. G., Leligou, H. C. **"Blockchain in next generation networks (ngns). In Handbook of Blockchain Technology".** Edward Elgar Publishing., pp. 329–348, 2025.

C. Peer-Reviewed Conference Proceedings

1. **Xevgenis, M. G.,** Toumanidis, L., Kogias, D. G., and Patrikakis, C. Z., **"The Virtual Lab (VLAB) Cloud Solution.,"** in 2016 IEEE Globecom Workshops (GC Wkshps), 2016.
2. **Xevgenis, M. G.,** Kogias, D., Leligou, H. C., Chatzigeorgiou, C., Feidakis, M. Patrikakis, C. Z., **"A survey on the available blockchain platforms and protocols for Supply Chain Management"** in 2020 IOT4SAFE, 2020.
3. Polychronaki, M., Christidis, I., **Xevgenis, M. G.,** Kogias, D. G. Leligou, H. C. (2024, December). **"My University Studies (MU St): An Academic Proof of Concept for the Web3. 0"** in Proceedings of the 28th Pan-Hellenic Conference on Progress in Computing and Informatics (pp. 148-154), 2025.

4. **Xevgenis, M. G.,** Theofanis Orphanoudakis, Iveta Orbánová, Carlo Stefano Cavicchioli, Maria Polychronaki, Christopher Karachristos, Matteo Francesco Puglisi, Riv L. Negka, Ioannis Christidis, Theodora Kouvara, Lattke Susanne, and Zoe Batsi (2025, November). **"Secure Microcredential management through Blockchain: The Block.Ed project"** in 2025 International Conference on Emerging eLearning Technologies and Applications (ICETA) (pp. 865-872), 2025.

D. Other Publications (Editorials, Technical Articles, Books)

1. **Technical Article:** M. Polychronaki, N. Kaftantzis, M. Xevgenis, D. Kogias, N. Leligou, *"(Demystifying) Blockchain Development: The BLER Use Case"*, **Cutter Business Technology Journal**, December 16, 2019, in *Business Agility & Software Engineering Excellence – Business Technology & Digital Transformation Strategies*.

PART E. PERSONAL SKILLS AND CERTIFICATES

Mother Tongue

Greek

Foreign Languages

- **English:** *Level Excellent*
- **German:** *Basic*

Skills

Computing & Engineering Skills

- DevOps and Cloud-Enabled Systems: Strong expertise in DevOps practices, cloud infrastructures, and deployment workflows supporting scalable and reliable computing environments.
- Computer Networks and Security: In-depth knowledge of network architectures, protocols, and security mechanisms, supported by research and teaching experience.

Teaching & Academic Skills

- Effective Knowledge Transfer: Proven ability to communicate complex technical concepts clearly through lectures, laboratories, and project-based learning at undergraduate and postgraduate levels.

- Student Supervision and Mentorship: Experience guiding students through coursework, projects, and research activities, fostering critical thinking and independent problem solving.

Professional Competencies

- Analytical and Engineering Problem Solving: Strong capability to investigate complex problems, evaluate alternative solutions, and select optimal approaches based on engineering principles.
- Teamwork and Leadership: Collaborative team player with leadership experience, comfortable assuming responsibility and contributing to academic and research objectives.
- Commitment to Continuous Development: Strong motivation for continuous learning, professional growth, and adoption of emerging technologies and methodologies.

Technical Achievements

Design and implementation of:

- ✓ A private on premise OpenStack cloud that consist of more than 10 servers, to support European funded projects.
- ✓ The VLAB a cloud native solution to support student laboratories through custom made virtual instances.
- ✓ A Kubernetes cluster for research purposes creating virtual testbeds for several use cases. Experience with installing and configuring Kubeflow to support AI workloads.
- ✓ A private permissioned blockchain network supporting 4 nodes running the EVM-based Quorum with QBFT consensus algorithm for research purposes.
- ✓ The M.U.St solution which is an initiative from LCIIS research Laboratory of UniWA to create an ecosystem of applications utilizing Blockchain to keep up with the Web 3.0 advancements, in order to provide the students with alternative ways to prove their academic credentials and profiling, within the environment of the university.

Certifications

- **NVIDIA-Certified Associate: AI in the Data Center** - This certification is awarded to successful candidates who pass the NVIDIA Certified Associate - AI in the Data Center exam. Topics covered include: Artificial intelligence, GPUs, networking, and infrastructure. **2023**

- **Google Project Management Professional Certificate (v2)** - Those who earn the Google Project Management Certificate, developed by Google, have demonstrated their competence in foundational project management. Through hands-on activities and assessments, graduates develop proficiency in initiating, planning, and running both traditional and agile projects, preparing them for introductory-level roles in project management. **2025**
